

HP DesignJet T830: Multifunction Reinvented at an Unbeatable Price

PRINT, SCAN, COPY AND SHARE—ROBUST, COMPACT 36-INCH WI-FI MFP FOR OFFICE AND CONSTRUCTION

The new HP DesignJet T830 Multifunction Printer (MFP) is a versatile product equally effective at the construction site and in the main office. It has been designed for robust performance in challenging environments and for easy transportability, especially with the HP DesignJet Rugged Case for construction accessory. Not only is it incredibly easy to use, but it offers convenient technologies—such as scanning technology that protects originals from damage—and mobile printing capabilities that help move projects forward.

The large format MFP is based on three pillars: robust, convenient and ideal for collaboration.

ROBUST

Damage-resistant for offices and job sites.

The HP DesignJet T830 Multifunction Printer is built to last and is the most compact 36-inch device performing large-format print/scan/copy functions. The new MFP from HP Inc. produces prints three times faster than previous HP models—with A1/D-size prints delivered in 25 seconds.

CONVENIENT

Easy operation helps users save time.

One of the centers of design of the new HP DesignJet T830 has been usability. With the new HP DesignJet T830, users will be able to complete tasks intuitively—almost three times faster than other devices—in part due to its one touchscreen that works like a smartphone.

IDEAL FOR COLLABORATION

Mobile print/scan for team sharing.

Use integrated scanning to capture and share plans, renders, redlining and feedback, enable archiving and more.

The new HP DesignJet T830 comes with Wi-Fi and Ethernet connectivity, but if everything fails in the environment where it is placed, the printer creates its own Wi-Fi network for easy connectivity with Wi-Fi Direct, allowing computers and smartphones to connect to the printer to print and the scanner to scan and create copies.

Another great feature that the HP DesignJet T830

“
We've been using the HP T830 printer/scanner/copier onsite at our large hospital project in Atlanta, and it has proven to be a very valuable jobsite tool allowing us to print everything from plans to full-size architectural color renderings for use in planning and coordination meetings, which not only saves us time, but saves us money as we don't have to outsource those printing services.
—Steve Karp, Project Director,
McCarthy Building Companies, Inc.

provides is its ability to conveniently scan, share and print right from your smartphone or tablet. Managing scans from your mobile device, smartphone or tablet with the HP AiO Printer Remote app, enabled by HP Mobile Printing, is really easy even for those who are not technologically savvy.
